## Environmental & Sustainability Policy Statement

At Tower Cold Chain we consider the environmental aspects of our activities and services to be vitally important both locally, nationally and internationally.

We ensure our temperature-controlled systems are robust, reliable and reusable.

It is our intention to convey this principle to our employees, contractors, customers and suppliers.

To support this, we are implementing an Environmental Management System (EMS) aligned to the requirements of the International standard ISO 14001:2015.

We are committed, through our Environmental & Sustainability Policy to:

- Complying with the requirements of environmental legislation and customer standards where applicable, to meet our environmental obligations.
- Protecting the environment.
- Ensuring environmental issues are considered in planning our business and managing our operations.
- Continually improving our environmental performance and processes through the development and achievement of measurable objectives and targets.
- Preventing pollution of the environment and having procedures in place to deal with environmental incidents.
- Complying with the environmental requirements set out within our Environmental Management System.
- Providing the necessary training and guidance to our employees and other workers to ensure they are fully aware of our environmental policy; our environmental objectives and targets and are able to contribute towards these commitments.
- Ensuring effective relationships are maintained with industry partners, regulatory bodies, and other interested parties.
- Examining our use of resources, utilities, equipment, and materials, seeking to minimise their use, and recycle waste whenever practicable and to use products from sustainable sources.
- Using suppliers who are prepared to comply with our environmental requirements.

As a minimum, we will review this policy annually to ensure its ongoing suitability and, as and when there are key changes (e.g. customer, legislative, operational requirements etc.).

Our Policy will be communicated to all individuals working for, or on behalf of, the company and included in our Induction training. It is available to our employees via our company electronic systems.

It will be provided to our supply chain as appropriate and is available to all interested parties upon request.

Niall Balfour
